**FOR IMMEDIATE RELEASE:**

## **GRISWOLD LLC to offer TPE extrusions in foamed and solid formulations**

Moosup, CT, 02/26/2016 – GRISWOLD LLC is pleased to announce the addition of TPE foam extrusions that can be provided in solid and foam profiles.

TPE's can be recycled and offer excellent tear/elongation characteristics along with the ability to thermoform in a secondary process.

Griswold installed the production line based on an existing customer requirement and the objective of further diversification into complementary products that enhance our portfolio of performance polymers.

Please visit Griswold at the upcoming Gasket Fabricators Expo in Orlando, FL on April 6, 2016.
